- Safety capability defect

● Unsafe action

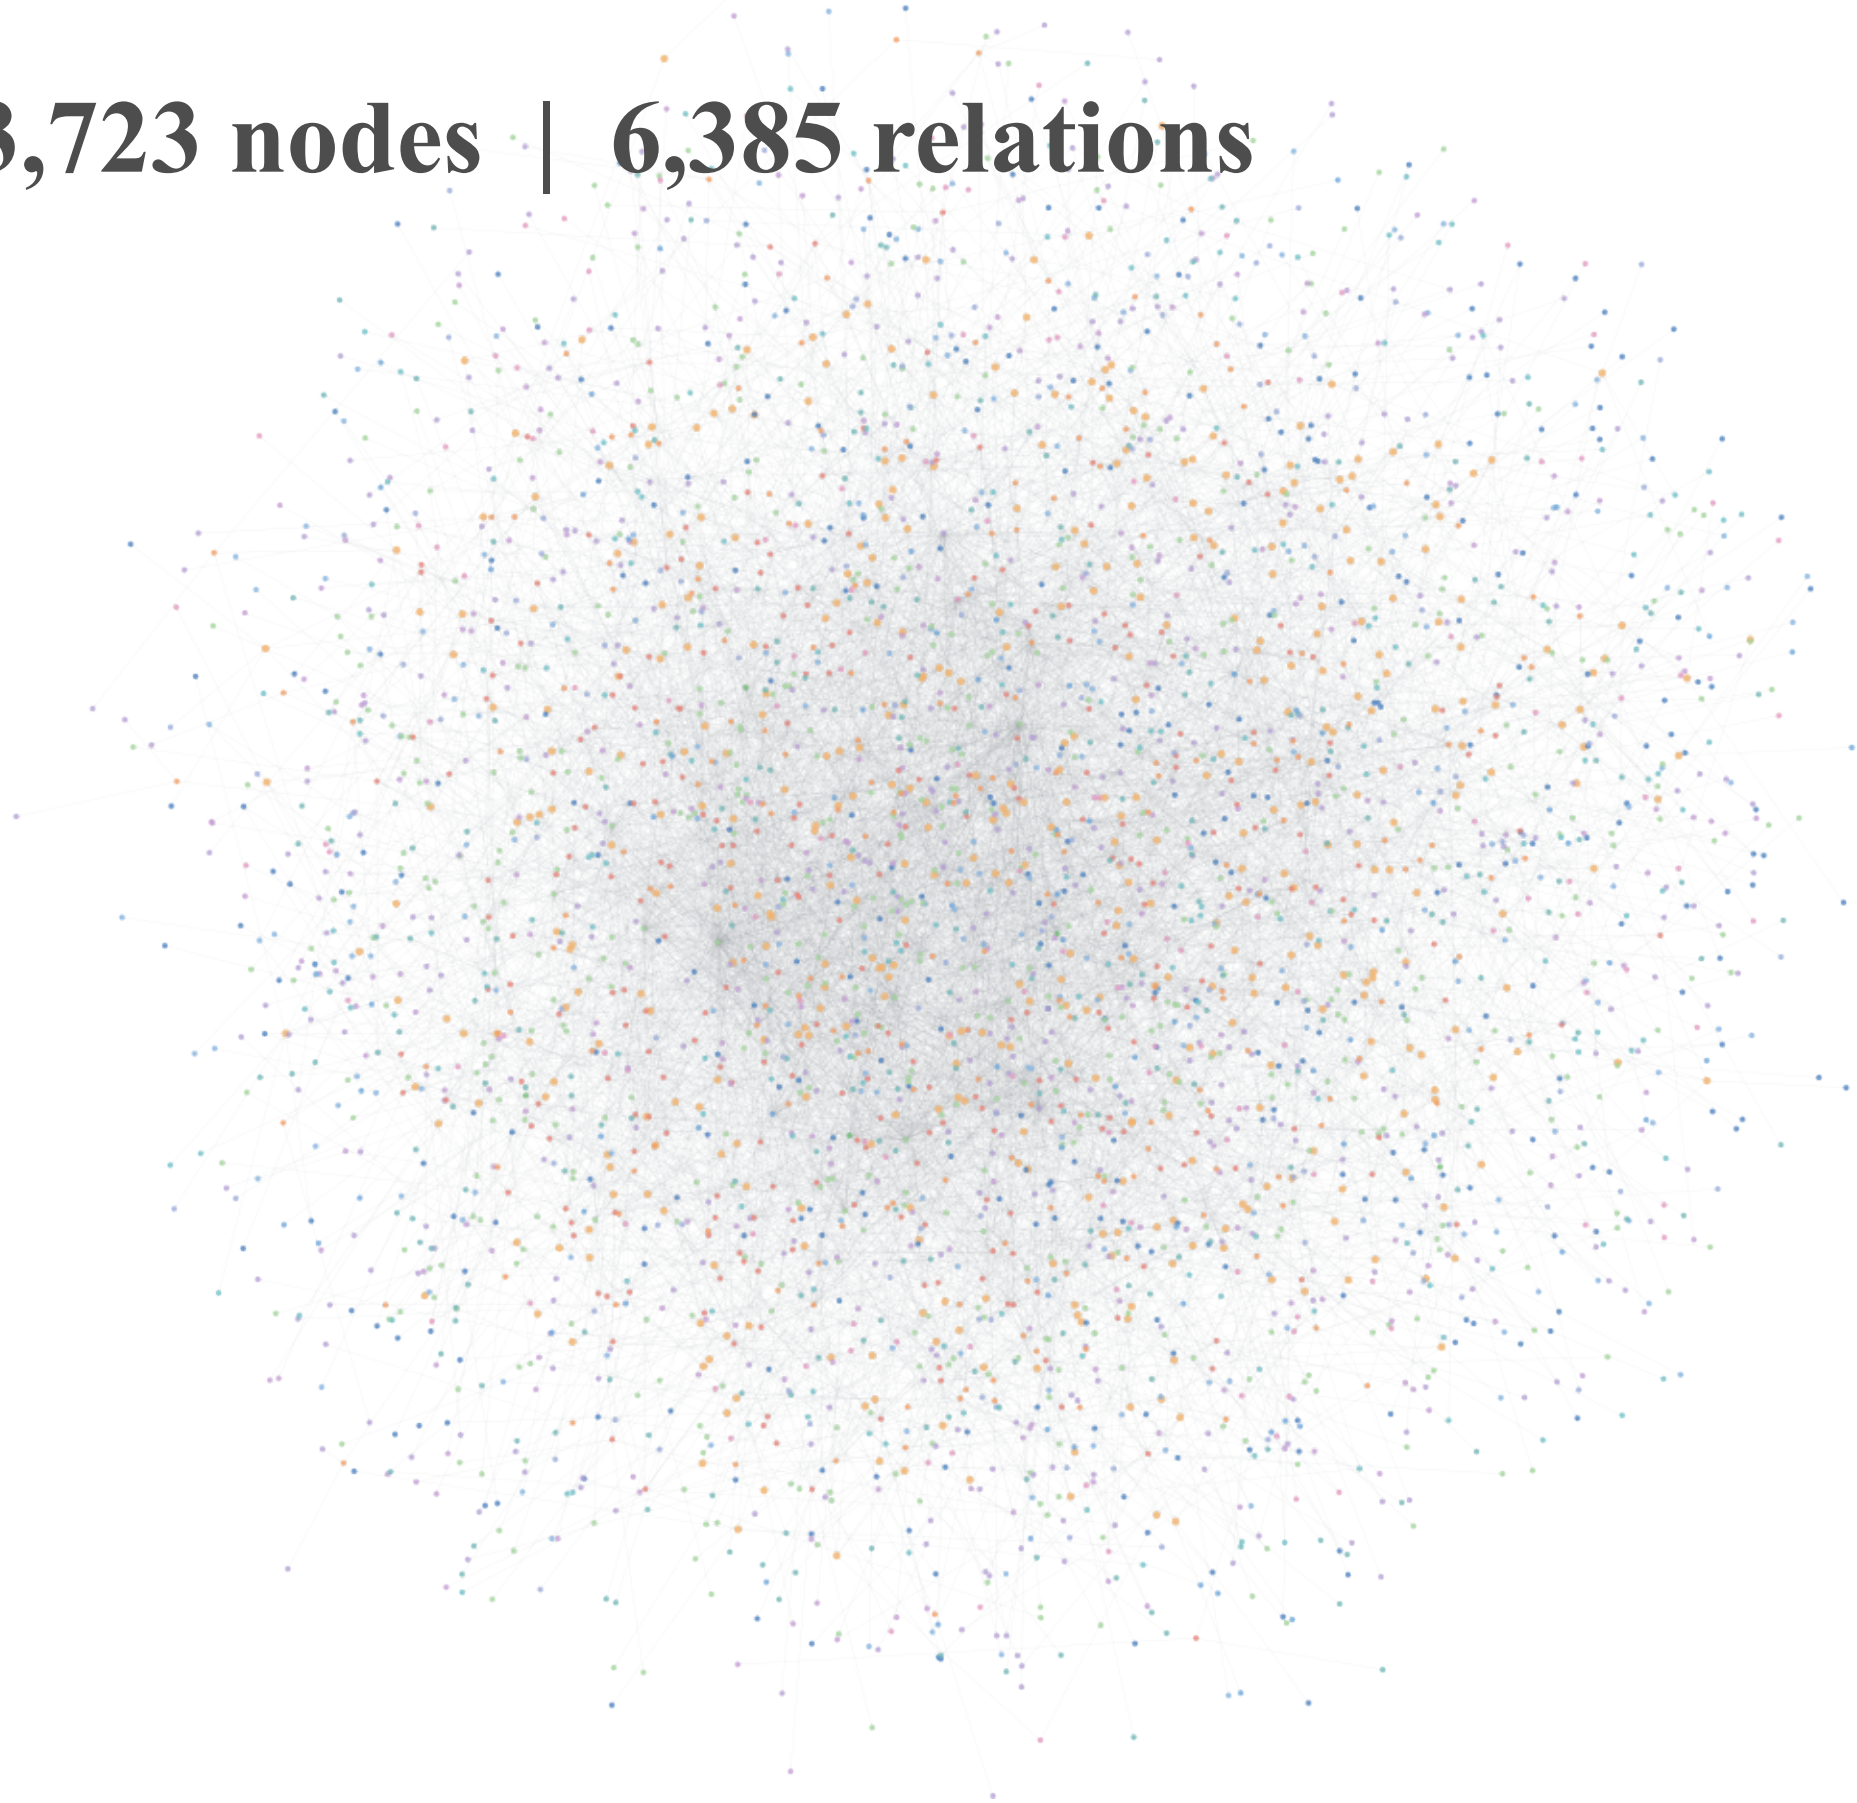

● Unsafe object state
- Accident process

● Consequence

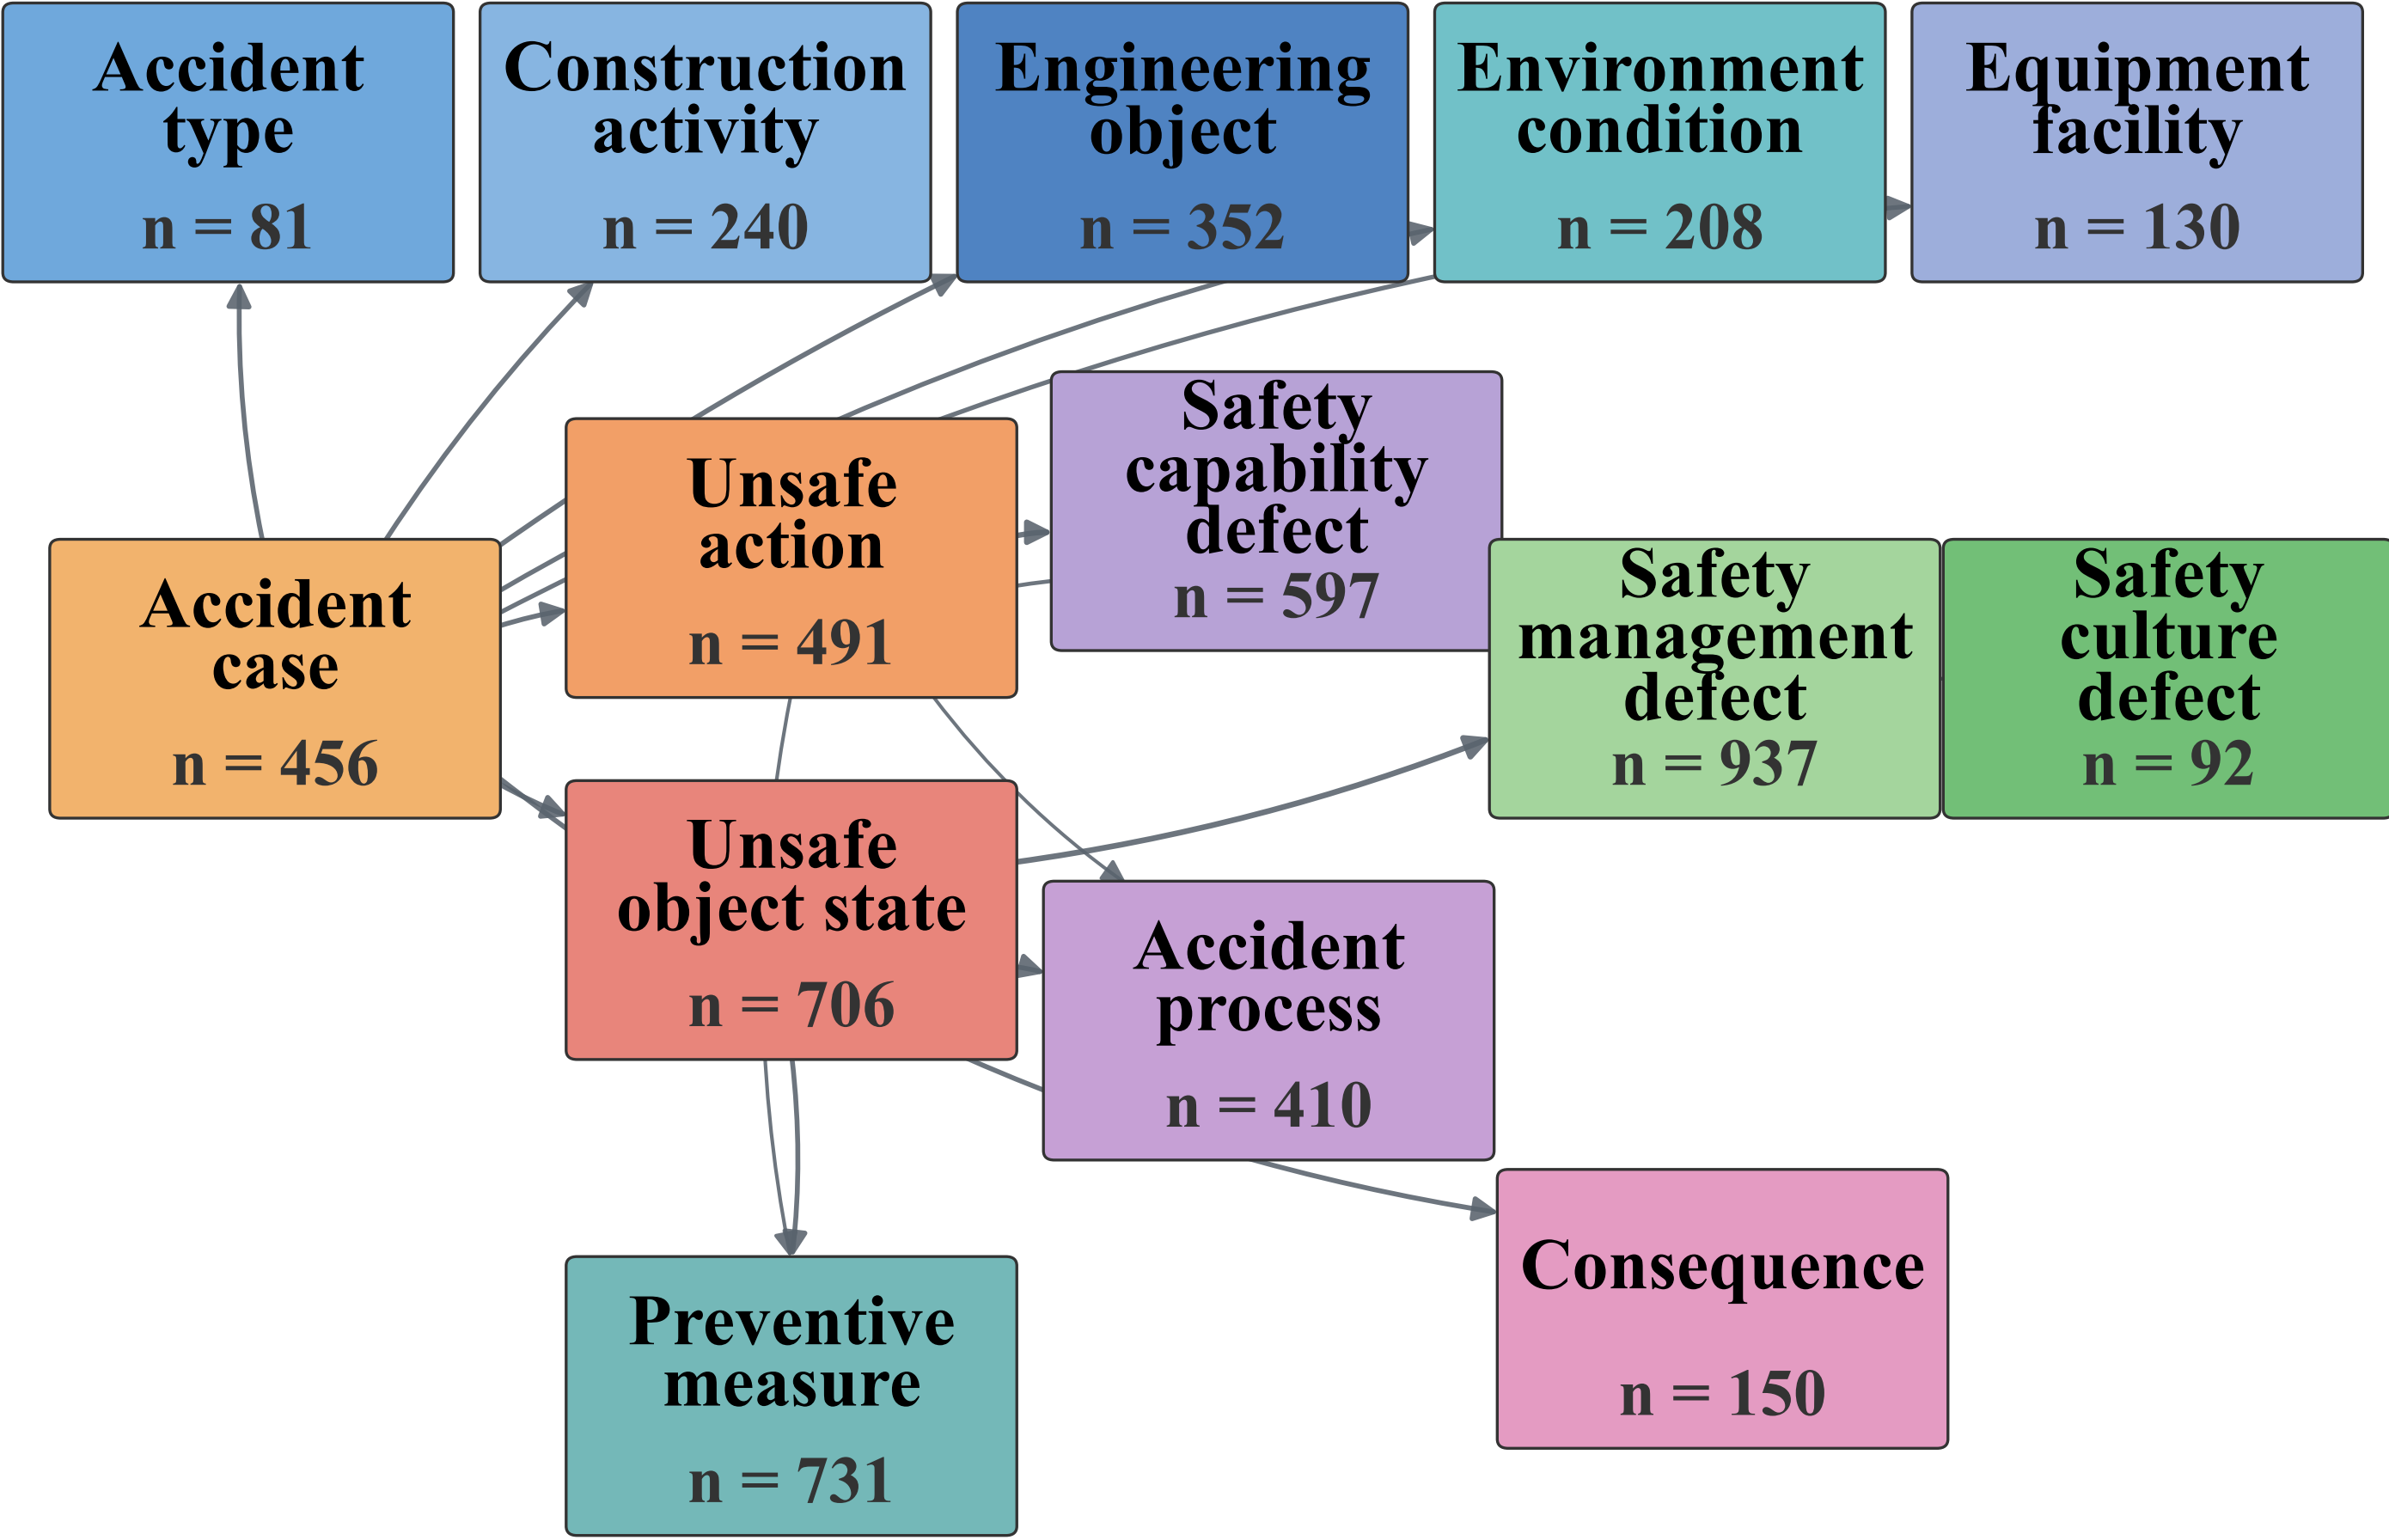

● Preventive measure

(a) Connected canonical HEC-KG

3,723 nodes | 6,385 relations

(b) Type-level projection
(edge width encodes relation frequency)

Canonical HEC-KG: 5,581 entities and 6,385 relations. The connected evidence core contains 3,723 entities; 1,858 accepted entities currently have no validated relation.
